AN ACT relating to transportation; providing certain privileges to the owner or long-term lessee of a qualified plug-in electric drive vehicle; authorizing in this State the operation of, and a driver’s license endorsement for operators of, autonomous vehicles; providing a penalty; and providing other matters properly relating thereto.

Legislative Counsel’s Digest:

Existing law authorizes the Department of Transportation to adopt regulations to allow certified low emission and energy-efficient vehicles to be operated in a lane on a highway under its jurisdiction designated for the preferential use or exclusive use of high-occupancy vehicles. (NRS 484A.463) Section 6 of this bill defines the term “qualified plug-in electric drive vehicle” in a manner substantially similar to the definition used by the Internal Revenue Service for the purpose of the tax credit made available for the initial acquisition of such vehicles. Section 7 of this bill requires that, with limited exceptions, each local authority shall establish a parking program for qualified plug-in electric drive vehicles. Section 7 provides that the owner or long-term lessee of such a vehicle may: (1) apply to the local authority for a distinctive decal, label or other identifier that distinguishes the vehicle from other vehicles; and (2) while displaying the distinctive identifier, park the vehicle without the payment of a parking fee at certain times in certain public parking lots, parking areas and metered parking zones. Section 10 of this bill authorizes the use of a qualified plug-in electric drive vehicle in high-occupancy vehicle lanes irrespective of the occupancy of the vehicle, if the Department of Transportation has adopted the necessary regulations. Section 13 of this bill causes the provisions of this bill that pertain to qualified plug-in electric drive vehicles to expire by limitation (“sunset”) as of January 1, 2018.

Section 8 of this bill requires the Department of Motor Vehicles to adopt regulations authorizing the operation of autonomous vehicles on highways within the State of Nevada. Section 8 defines an “autonomous vehicle” to mean a motor vehicle that uses artificial intelligence, sensors and global positioning system...
coordinates to drive itself without the active intervention of a human operator. 
Section 2 of this bill requires the Department, by regulation, to establish a driver’s 
license endorsement for the operation of an autonomous vehicle on the highways of 
this State.

2. As used in this section, “autonomous vehicle” has the 
meaning ascribed to it in section 8 of this act.

483.630, inclusive, and section 2 of this act, a person shall not steer 
or exercise any degree of physical control of a vehicle being towed 
by a motor vehicle upon a highway unless such person has a license 
to drive the type or class of vehicle being towed.

4. A person shall not receive a driver’s license until the person 
surrenders to the Department all valid licenses in his or her 
possession issued to the person by this or any other jurisdiction. 
Surrendered licenses issued by another jurisdiction shall be returned 
by the Department to such jurisdiction. A person shall not have 
more than one valid driver’s license.
